

# 摺紙飛機 DIY

## 製作方法 Making Method :

- 1 紙對摺反開，向中線摺兩隻角。  
Fold in half on centerline and open flat. Fold 2 corners up.

- 2 三角形向內摺。  
Fold tip up.

- 3 再向中線摺兩隻角。  
Fold 2 corners up again.

- 4 向中線對摺，摺下兩邊機翼。  
Fold in centerline & fold both wings down.

- 5 剪下垂直尾翼及向上屈。  
Cut vertical stabilizer and fold it up.

- 6 向上微屈曲機翼端調較升力。  
Curl wing tips slightly to adjust lift.

- 7 如有需要，調較機頭 / 機尾重量，可用萬字夾、膠紙或告示貼等。  
If need, use paper clips, adhesive tape or post it to adjust weight of nose or tail.

## 材料及工具 Materials & Tools

A4 紙、剪刀、萬字夾、膠紙及顏色筆  
A4 paper, scissors, paper clips, adhesive tape & colour pens

## 投擲小貼士 Flying Tips :

高空飛行，向上輕微屈曲機翼端，並用力向上60度擲出。如飛機失速（急墜）及旋轉，減少屈曲機翼端及擲出力度。欲水平飛行，增加微屈曲機翼端，輕微向下角度擲出。如飛機滾向一方，檢查機翼及機尾是否對稱。

For high flights, curl wing tips up only slightly & throw hard at 60° upward angle. If aircraft stalls & spins out, decrease wing curl or don't throw so hard. For gentle straight glides, increase wing curl & throw gently at slight downward angle. If aircraft rolls to one side, check wings & tail alignment for symmetry.
